

SUDHANSH KHADELWAL
Course : **B.E.**, Electronics and Communication Engineering, 2028
Email : f20240255@hyderabad.bits-pilani.ac.in
Mobile : 7976031369
CGPA : 8.45

ACADEMIC DETAILS				
COURSE	INSTITUTE/COLLEGE	BOARD/UNIVERSITY	SCORE	YEAR
CLASS XII	Tagore Public School	CBSE	91.4 %	2024
CLASS X	St Anslem North City School	CBSE	89.8 %	2022
Subjects / Electives	Signals and Systems , Microprocessors and Interfacing , Digital Design , Foundations of Data Structures and algorithms , Electronic Devices , Microelectronic Circuits , Electrical Sciences , Control Systems			
Technical Proficiency	Object-Oriented Programming (OOP), Python, Verilog, Data Structures, NumPy, Simulink, Matplotlib, SQL, Pandas, C++ Language, Machine Learning - Scikit Learn, LTSpice			

INTERNSHIPS	
Embedded System, CSIR CEERI JAIPUR	May 2026 - Jul 2026
- Worked on TI IWR1843BOOST mmWave radar for embedded sensing and object detection applications. - Performed radar data acquisition, preprocessing, and point cloud analysis using Python. - Assisted in testing, analyzing, and documenting radar-based embedded system performance and observations. - Configured radar parameters and validated output using TI mmWave Demo Visualizer and related tools	

TEST SCORES		
TEST NAME	DATE OF EXAM	SCORE
JEE MAINS	Apr 5, 2024	98.76 Percentile
JEE ADVANCE	May 26, 2024	Rank: 11398
BITSAT SCORE	May 20, 2024	Score:288/390

PROJECTS	
Employee Salary Prediction using Machine Learning and MySQL - Data Science , Machine Learning	Jun 2026 - Present
- Built an Employee Salary Prediction application using Python, MySQL, Scikit-learn, and Streamlit. - Performed data preprocessing, SQL analysis, trained multiple machine learning models, and developed a web interface for real-time salary prediction and data visualization.	
Multi-Threaded Limit Order Book & Matching Engine - C++, MultiThreading, Data Structures ,OS	May 2026 - Present
- Developed a multi-threaded Limit Order Book and Matching Engine in C++17 implementing price-time priority for order execution. - Designed a producer-consumer architecture using <code>std::thread</code>, <code>std::mutex</code>, <code>std::condition_variable</code> and a custom thread-safe queue for concurrent order processing. - Implemented order submission, matching, modification, cancellation, partial order execution, trade history maintenance, and persistent trade logging. - Utilized efficient STL data structures (<code>std::map</code>, <code>std::deque</code>, <code>std::unordered_map</code>) to manage price levels and enable fast order lookup. - Structured the project using modular object-oriented design with dedicated classes for <code>Order</code>, <code>OrderBook</code>, <code>MatchingEngine</code>, <code>Trade</code>, and <code>Logger</code>.	

EXTRA CURRICULAR ACTIVITIES	
Ultimate Frisbee	Part of ultimate frisbee team on campus
Badminton	Won Gold medal at School level competition
